

## Incremental approach:

<b>Parameters</b>	Basic suite:	Weighted topological approach	Adjust parameters to fill research gaps, reduce parameters if PCA or factor analysis are available.
<b>Location</b>	Topological approach	Weighted topological approach	Geo-statistical method
<b>Frequency</b>	1 sample per season	4-12 sample per year	Calculated from available data (ex. $N = [(t\alpha/2 S / R) * 2]$ )

Minimal data  
and capacity

Increasing data, budget and capacity
